DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Species of probe detection methods

A) detection uses flow cytometer (claim 5),

B) detection uses a confocal microscope (claims 6, 7).

II. Species probe characteristics

C) luminescence emission spectral distribution (claim 9, in part; claim 12, in part),

D) lifetime (claim 9, in part; claim 12, in part),

E) intensity (claim 9, in part; claim 12, in part),

F) burst duration (claim 9, in part; claim 12, in part),

G) polarization anisotropy (claim 9, in part; claim 12, in part).

III. Species of types of hybridization probes by label

H) single dye molecules (claim 10, in part; claim 13, in part),

I) energy transfer dye pair (claim 10, in part; claim 13, in part),

J) nanoparticles (claim 10, in part; claim 13, in part),

K) luminescent nanocrystals (claim 10, in part; claim 13, in part),

L) intercalating dyes (claim 10, in part; claim 13, in part),

M) molecular beacons (claim 10, in part; claim 13, in part).

IV. Species of single probes

N) single probes are oligo DNA (claim 16, in part; claim 18, in part),

Art Unit: 1637

O) single probes are oligo RNA (claim 16, in part; claim 18, in part),

P) single probes are oligo beacon (claim 16, in part; claim 18, in part),

Q) single probes are oligo PNA (claim 16, in part; claim 18, in part),

R) single probes are oligo LNA (claim 16, in part; claim 18, in part),

S) single probes are chimeric oligos (claim 16, in part; claim 18, in part).

V. Species of multiple probes

T) multiple probes are hybridization pairs (claim 17, in part; claim 20, in part),

U) multiple probes are invader oligo pairs (claim 17, in part; claim 20, in part),

V) multiple probes are ligation oligo pairs (claim 17, in part; claim 20, in part),

W) multiple probes are mismatch extension 5'-exonuclease oligo pairs (claim 17, in part; claim 20, in part),

X) multiple probes are energy transfer oligo pairs (claim 17, in part; claim 20, in part),

Y) multiple probes are 3'-exonuclease pairs (claim 17, in part; claim 20, in part).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Specifically, Applicant is required to select one species from each of the groups I-III and one species from either group IV or group V. Currently, claims 1-8 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1637

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1637
